

Digital Medicine Cabinet

Now you can have your entire medicine cabinet right in the palm of your hand!

That's right. And our medicine cabinet never has to be restocked because it is full of remedies that last forever. This is possible because each of our remedies is a "song" consisting of a precise combination of complex frequencies that addresses a specific symptom or condition. This is much more than music or sound therapy. This is actual medicine. But medicine you "listen to" rather than "swallow".

Right about now you might be thinking, "No Way!". But you owe it to yourself to spend a few minutes learning more about our Digital Sound Remedies (DSR) and why we believe we are at the forefront of medicine. This will forever change how you look at medicine.

We have several versions of our Digital Medicine Cabinet (DMC) for professional practitioners, and we also have a special version for home users. Below we discuss the benefits and how to use our DMC in practice and at home.

Benefits to Professional Practitioners

Get better results treating a wide variety of conditions. No matter what type of conditions you may treat and which modalities you may use in your practice, our digital remedies will help you get better results in a shorter period of time.

Improve the efficacy of other therapies. Our DSR technology is very synergistic with most any therapy. Using our digital remedies along with massage, laser, resonant light, sound, color, bioresonance, TENS, and any other "energy therapy" will increase the efficacy of the treatment, sometimes dramatically. Most practitioners using our digital remedies with other therapies have experienced better results in a shorter period of time.

Significantly reduce your stock of herbs, supplements, and homeopathy. Stocking lots of herbs and supplements can be expensive. Each of the remedies in the DMC can be imprinted into a bottle of water (an additional device needs to be purchased) and used by the patients/clients as their "take home" medicine. Practitioners using our digital remedies typically stock only a few key supplements, thus reducing costs. They may also derive income from the imprinted remedies that are taken home.

Easy to travel and transport. Imagine how amazing it would be if you could have all of your medicine with you at all times. That's exactly what you'll have when you join the DMC revolution!

The Remedies

Each remedy stored in the DMC addresses a particular health condition. For example, the "Digestion" remedy is used for someone having problems related to digestion. Each remedy is a combination of herbs, flower essences, and homeopathics. Special frequencies have also been added to focus the therapy on particular organ systems and to certain brain wave states. Nature sounds have also been added so you may have a pleasing and relaxing experience while listening to your medicine. The remedies are each five minutes in length (what we call one dose), and this is usually all you need to get a response.
